

Enhance and Preserve the Value of Your Home With

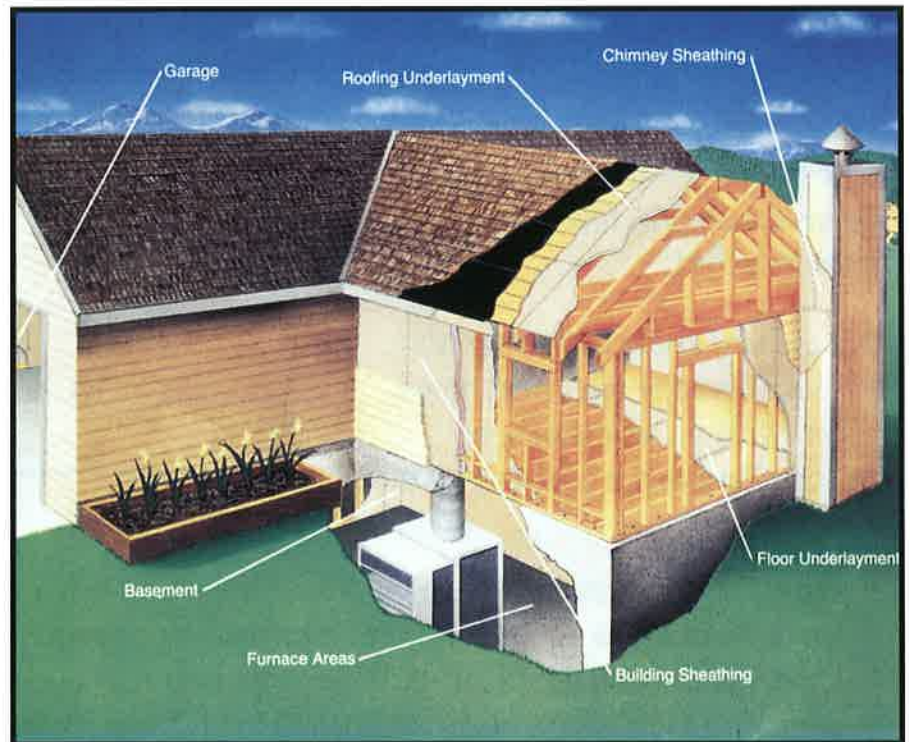

LOW-COST, SOUND-DEADENING, FIRE-RESISTANT

GYPSUM BOARD

FINISH THE GARAGE...FINISH THE BASEMENT...FINISH THE ENTIRE HOUSE...

Improved aesthetics is the most obvious benefit to finishing garages and basements and enclosing furnace areas with gypsum board. The more important benefits, however, are the added fire protection and sound control. The added safety and security afforded to homeowners more than offset the minor increase in investment.

Give your home the added resale advantage by incorporating the added safety, added comfort, added value, added utility, and added living space provided when you use gypsum board to finish these often overlooked areas of a home.

At a Fraction of the Cost of Many Upgrades,

USING 5/8" FIRE-RATED TYPE X GYPSUM BOARD

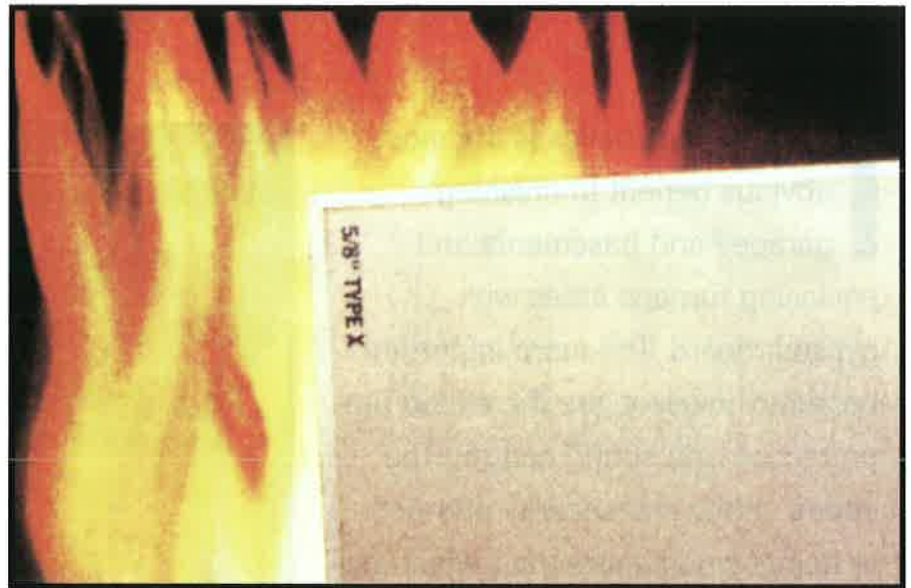

Significantly Enhances Performance

Many builders, designers, and knowledgeable homeowners are already aware of some of the added value and benefits of upgrading from the bare minimum requirements of the building codes to higher quality walls and ceilings covered with 5/8" fire-rated type X gypsum board.

But did you know that using 5/8" gypsum board in your next home, room addition, renovation, or remodeling project provides all these benefits:

- Added family security and safety through increased fire resistance,
- More flexibility in decorating through flatter, smoother wall and ceiling surfaces,
- Improved occupant comfort through increased noise control and reduced sound transmission,
- Long term durability through increased impact resistance, and
- Fewer problems through superior nail holding power.

The cost for this quality upgrade is minimal as 5/8" gypsum board is installed almost the same way as 1/2" gypsum board.
