## PROPRIETARY GYPSUM PANEL PRODUCTS FOR USE IN UL CLASSIFIED SYSTEMS

(GA-605)

Rev. March 27, 2012

The *Fire Resistance Directory* published by Underwriters Laboratories Inc. lists gypsum panel products that are classified for fire resistance under category “Gypsum Board (CKNX).” Each UL Design lists the specific manufacturers and products that are suitable for use in the design. The products are identified with a Type designation that ties back to specific board formulations. The UL Type designation appears on the UL label on the product. However, gypsum board end tapes and product literature do not generally contain the UL type designation but a product name or trademark. The following tables provide a quick and easy reference to identify the specific products, brand names, or trademarks of each gypsum board manufacturer for each type designation in the *UL Directory*.

COMPANY NAME	PAGE
American Gypsum Company LLC	1

To confirm that a specific product is suitable for the UL *Fire Resistance Directory*, verify that the product bears the full UL Classification Mark. The UL Mark is required to be on each product that complies with the UL Classification and Follow Up Service requirements. A UL Classification Mark for gypsum board (CKNX) should contain the following information:

UL symbol, the word "CLASSIFIED" above the UL symbol,  
and the following additional information:

GYPSUM BOARD  
FIRE RESISTANCE CLASSIFICATION  
DESIGN NO(S). \_\_\_\_\_  
SEE UL FIRE RESISTANCE DIRECTORY  
Issue No.

or  
GYPSUM BOARD  
FIRE RESISTANCE CLASSIFICATION  
SEE UL FIRE RESISTANCE DIRECTORY  
Issue No.

In addition to the UL Mark, each package or bundle of gypsum board will also contain a) the Classified company's name and/or "File No.," b) Type Designation, c) Nominal Thickness, and d) Factory ID.

UL does not reference trade names in the Classification information. Cross referencing the type designation on the product to the specified gypsum board in the UL *Fire Resistance Directory* is the only true way to verify the specified product is selected. The UL online directory is a free and up to date tool to reference UL *Fire Resistance Directory's* and to confirm the specified gypsum board is suitable for use.
